

R Programming offers a set of default functions & libraries (such as ggplot2, baseR, lattice) to create visualizations & present data effectively. Below is a guide to create basic and advanced visualizations in R

BASIC VISUALIZATIONS

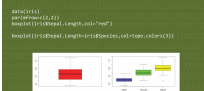

Histogram

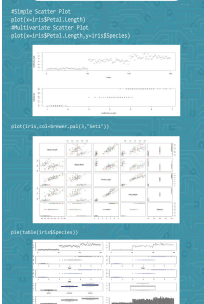

Bar/ Line Chart

Box Plot (including group-by option)

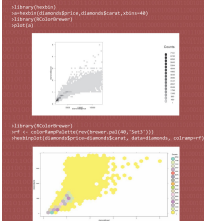

Scatter Plot (including 3D and other features)

Advanced Visualizations

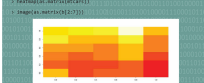

Hexbin Binning

Mosaic Plot

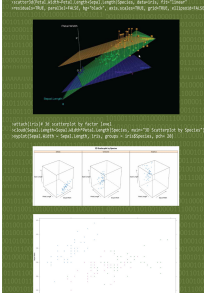

Heat Map

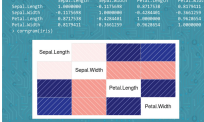

Map Visualization

3D Graphs

Correlogram (Gijb)
